

City of Bay Minette

Access / Culvert Permit

301 D'Olive Street · Bay Minette, Alabama 36507 · Phone (251) 580-1650
COBM_Planning@cityofbayminetteal.gov

Access/Culvert permits are intended to promote the overall safety of motorists, bicyclists, and pedestrians; to reduce interference with through traffic by other vehicles entering, leaving, and crossing streets; to assure safe access to and from streets by emergency vehicles; and to preserve the traffic capacity of streets. No curbs or rights-of-way may be cut, paved, or otherwise altered until a permit for the access/driveway has been secured from the City and/or any other governmental agency owning or controlling the street right-of-way. An access/driveway, which demonstrates a potential danger to the public and/or which could affect the safe, efficient flow of traffic, may be denied following a recommendation from City Staff, based on commonly accepted and applied traffic engineering principles, emergency response requirements or other potential threats to the health, safety and welfare of the public.

Applicant Name: _____ Date: _____

Mailing Address: _____

Phone No.: _____ Email: _____

Property Address: _____

Roadway Location of Access/Culvert: _____

PID or PIN: _____

When/How will the location of the requested culvert and/or driveway be marked? Date: _____
